REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The claimed method has a sequential step of adding a microbe capable of converting the accumulated GKDM produced in the first step, into GDP-fucose. The sequential addition produces unexpectedly large amounts of GDP-fucose as shown in the present examples. Therefore, the instantly claimed method is unobvious over the prior art.

Claims 18, 19, 21 and 22 are rejoined as they are dependent on allowed claims and do not present further issues as the genes mentioned in the claims are well known in the art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
